If AS been persuaded to make a professional visit to some of the principal cities in the United States, thereby to bring his skill within the reach of the sufficient thousands who could not avail themselves of it in New York. The success of Dr. JOHANNES A. JONES in the surgical and medical treatment of the Eye and Ear and old-standing complaints, has been looked upon with astionishment and joy. The press has recorded many of the skillful operations, reminding the people that they cannot always have Dr. Jones with them, and not to de'sy if they need his services.

In the treatment of the EAR AND EYE, and
other organs of seene, it becomes necessary to
have a good knowledge of every thing pertaining to medicine and surgery. What are called
regular Physicians may have graduated in
either the old or the new school college, and
can beast of a one-sided education. Dr. Jones
has had a thorough education in both the old
and the new school medical colleges, and
in an Eye and Ear College, and in the
Eye and Ear Infirmaries and Hospitals
of America and Europe, and his Diplomas from the same hang in his office.
It is impossible for a physician who has but
the usual medical education, to successfully
treat the Eye and Ear. Therefore Dr Jones
has availed himself of all the advantages the
world affords to fit himself for his natural and
chosen profession; and of his success the reader
